

An easy way to raise funds for the Girlguiding Clwyd Ty Clwyd extension

This is for people who use the internet and requires very little time and effort and costs you **NOTHING**.

All you are doing is changing your internet search engine to a different one run by Yahoo (or a different Yahoo one, if you already use Yahoo).

Every time you use the new search engine to search on the internet and then click on one of the searches, Girlguiding Clwyd earns money. Yahoo gives some of its sponsorship money to Girlguiding Clwyd.

You can set your search engine at home, recommend it to friends and colleagues and see if you can get your employer to allow it to be used by all employees in your workplace.

Interested??? Then, here's what to do.....(depending on your operating system, some things may show slightly differently)

On the internet, type in the following,

<http://admin.whitedotbox.com/myhomepage.asp?OrgID=3239>

The Girlguiding Clwyd search homepage comes up.

You have two choices to set the search engine box (as your homepage or as a browser),

Either:

- a) Click on set homepage, a box will come up for you to click by the side of "Use this page as your only homepage", Yes (if this box doesn't come up, your new homepage has been automatically accepted)
- or,
- b) Click on add browser box, click on "click to add us as your search provider", a box will come up for you to click next to "Have this as the default search provider", Replace provider, Ok. (The browser box is the search box on the tool bar at the top of the screen)

If you change your mind, you can

- a) Change the homepage back. On the internet, go to the internet page that you would like as your homepage, on the top toolbar, select Tools, Internet Options, in the General tab, under homepage click on use current, Ok
- or,
- b) Change your browser back. On the internet, click on the drop down arrow next to the browser box, Find more providers, click on the one you want, a box will come up for you to click next to have this as the "Default search provider", Replace provider.
